SUMMARY

I am a passionate and aspiring Python developer with strong knowledge of core Python concepts including OOP, exception handling, and file handling. I have a good understanding of data structures, algorithms, virtual environments, package management, REST API integration, JSON handling, and SQL databases. I also possess basic frontend development skills with React and Flutter. With strong logical thinking, teamwork, communication skills, and a growth mindset, I am eager to contribute and grow as a Python developer.

EDUCATION

Bachelor running | Software Engineering,

2022 – Current

Nepal College of Information Technology, Lalitpur

- 8th sem student

Languages & Frameworks:

Python, Django, Dart/Flutter, C, C++, JS

Tools & Platforms:

Git, GitHub, Jupyter Notebook, VS Code, Google Colab

DevOps & Cloud

- Docker, AWS EC2, AWS Auto Scaling, Linux Administration, CI/CD Concepts, Prometheus, Grafana

Python and Databases:

- MySQL, SQLite, Flask, REST API Development, OOP, File Handling

PROJECTS

Venue-Booking App

Venue Booking app using flutter and firebase with the basic features of logging in as a client and owner, viewing the available venues, making bookings, payment options, tracking booking history and booking statistics.

Sacred-Kathmandu

Website using React that helps to track or visit all the religious sites in Kathmandu along with their basic information and location details

GharKoKaam

Using GharKoKaam customers can browse verified workers by service category and area, book appointments, track booking status in real time, and leave reviews. Workers can register, list their own custom services, and track their earnings. The platform features role-based access, JWT authentication with auto token refresh, and a complete booking lifecycle from pending to completion.

Certificates

AWS Badge  — Completed the AWS Academy Cloud Foundations course, gaining hands-on knowledge of core AWS services, cloud architecture principles, pricing models, and AWS support structures. Badge verified on Credly. Skills covered: AWS Architecture · AWS Cloud · AWS Core Services · AWS Pricing · AWS Support
